

## UNIFIED COMMUNICATIONS

### cloudsolutions FoIP

The **cloudsolutions FoIP** Service allows the sending and receipt of faxes by associating a telephone number to the client's email account. This Service allows both fax equipment to be eliminated as well as significant savings in paper.

### cloudsolutions VoIP

The **cloudsolutions VoIP** Service is a complete corporate unified communications solution. This application is easy and intuitive to use and provides essential functions for communication and collaboration in a corporate environment. The Service includes instant messaging, voice, video and nomad numbering.

### cloudsolutions SMS

The **cloudsolutions SMS** Service allows clients to send SMS to multiple destinations simultaneously and in a quick and simple manner. SMS can be sent from any email account or integrated into any client application. Moreover, clients also have at their disposal a report mechanism which confirms SMS delivery and sender ID.
